

Aspiring software engineer skilled in MERN stack, building scalable web applications with real-time and AI-powered features.

EDUCATION

• **Bachelor of Technology in Computer Science and Engineering**
Kurukshetra University, Kurukshetra

2023-2027

PROJECTS

• **CodeCraft AI — Agentic AI Coding Assistant** ([LINK](#))

- Developing an AI-powered coding assistant focused on intelligent code understanding and developer productivity.
- Implemented **RAG-based architecture** for retrieving relevant code context.
- Built agentic workflows for AI-driven task execution and tool interaction.
- Designed memory-based conversation handling with short term and long-term context.
- Added human-in-the-loop feedback mechanisms for improving AI responses.

• **Plant Project — Full Stack E-Commerce Platform** ([LINK](#)) ([Tryit](#))

- **Built a** complete e-commerce platform with scalable backend APIs and frontend integration.
- Developed authentication system with JWT, password hashing, email verification, and password recovery.
- Implemented role-based access control for Admin, Staff, Vendor and Customer workflows.
- Designed APIs for products, categories, subcategories, cart, orders, reviews, wishlist, coupons and vendors.
- Added product search, filtering, pagination, flash sales and a admin dashboard functionality.

• **Laksh AI- AI Career Coach** ([LINK](#)) ([Tryit](#))

- A tool that help in **personalized interview preparations, resume improvements and industry insights** for students.
- **Integrated advance tools** to deliver seamless, secure and scalable experience.
- Implemented **AI-powered resume analysis**, career guidance, and roadmap generation using **Google Gemini API** for personalized user insights.
- Designed modular and reusable components to enhance maintainability and scalability of the application.

EXPERIENCE

Web Developer Intern(June 2026 - Present)

Sun Innovation-web-tech (Delhi,India)(remote)

- Developed backend services for a CRM system using Node.js, Express.js and MongoDB.
- Built REST APIs for modulus including Users, Employees, Leads, Projects, Tasks, Documents, and Invoices.
- Implemented JWT-based authentication and role-based authorization for secure access control..
- Tested and debugged APIs using Postman.
- Deployed backend applications on VPS infrastructure using Docker and Coolify.

TECHNICAL SKILLS AND ABILITIES

Languages: C/C++, Python, JavaScript(ES6+), HTML5,CSS3,TypeScript

Libraries: C++ STL, Python Libraries, React

Other Skills: Git & GitHub, Authentication(JWT)

Frameworks: Next.js

Databases: MongoDB, Relational Database (MySQL), Postgre SQL, AWS, Vercel,Render

Relevant Coursework :Data Structures & Algorithms, Operating Systems, Object Oriented Programming, Database Management System, Software Engineering, UNIX/LINUX Programming, etc.

Soft Skills: Problem Solving, Adaptability, Agile, Communication, Team Collaboration, Time Management,Organizational Skills, Research, Documentation

ACHIEVEMENTS

- **Scholarship Holder** in all semesters
- **Smart India Hackathon** Participant
- Participant in **Google Cloud Arcade Facilitator Program** and **Girl Script Summerof Code2025**
- Lead my team and become the part of top 20 teams at **Youth Ideathon IIT Delhi (2025)**
